SUMMARY

I am more than just a Computer Science Engineering student—I am deeply curious about how technology works, from silicon chips to intelligent software systems. I enjoy solving complex problems, building real-world applications, and using AI to develop efficient solutions. With strong debugging, analytical, and coding skills, I continuously learn, innovate, and create technology that makes people's lives easier

EDUCATION

Government Higher Secondary School, Mangalapuram Degree in 6th to 12th	Namakkal,TamailNadu 2016-2023
Gnanamani College of Technology Computer Science and Engineering Bachelor of Engineering	Namakkal,Tamil Nadu August2023 - August 2027

EXPERIENCE

Cybernaut Python intern Completed a Python internship with hands-on experience in Python programming, problem-solving, automation, and basic project development.	Online Nov/2025 - FEB/2026
Rinex Technology Private Limited Cybersecurity Intern Tamilnadu,india February 2024 - May 2024 Experienced in ethical hacking, vulnerability scanning, URL threat analysis, secure coding, and network security monitoring.	
Tata Group Data Visualization Intern Online June 2025 - June 2025 Skilled in Power BI, Tableau, Excel, and SQL for data analysis, dashboard creation, and business insight reporting.	
HGRD Edu Tech Marketing Head I am working as a Marketing Head at HGRD Edu Tech, focusing on branding, digital marketing, promotions, and team coordination.	Namakkal,Tamil Nadu JAN/2025 - SEP/2025
Social Summer of Code Contributor Online April/2026 - Nov/2026 Open-source contributor with experience in collaborating on projects, improving code, reporting issues, and supporting community-driven development.	

SKILLS

Programming Languages:	Python, Java, C++
Libraries/Frameworks:	FastAPI, Flask, LangChain, TensorFlow, OpenCV, Spring Boot
Tools / Platforms:	Power BI, VS Code, n8n, Git & GitHub, Linux, Antigravity, Claude Code, Microsoft Office
Databases:	MySQL, MongoDB

PROJECTS

<u>Banking RAG System</u> Developed and contributed to a Banking Retrieval-Augmented Generation (RAG) system focused on intelligent document retrieval, semantic search, and AI-powered question answering using Python and LLMs.	Python
<u>Load-Balancer Link</u> Independently developed the public open-source project Load-Balancer to manage and distribute network traffic efficiently. Improved application performance, server reliability, and backend handling through optimized request management.	Python

CERTIFICATIONS

LFS101: Introduction to Linux - The Linux Foundation
GitHub Foundations – GitHub
Cloud DevOps - Intel
Introduction to Cybersecurity - Cisco Networking Academy
Python Essentials 1 - Cisco Networking Academy
Introduction to Model Context Protocol – Anthropic
LFS169: Introduction to GitOps – The Linux Foundation
MongoDB Basics for Students – MongoDB
Career Essentials in Software Development – Microsoft & LinkedIn

Hackathons & Technical Activities

Smart India Hackathon (SIH) — Team Lead
Cyber Security Club Member – Gnanamani College of Technology
Participated in 5 competitive hackathons
Attended 8+ Tech Events, Workshops, and Developer Conferences
